

Hunter®

The MP Rotator's multiple, rotating streams are fascinating to watch. But form follows function in a quality irrigation product, so each MP Rotator stream is designed to complement its partners. The MP Rotator's wind-resistant, multi-trajectory streams apply water much more slowly and uniformly than conventional mister and sprays...especially after adjustments. This prevents unwanted wet spots and ugly brown spots from appearing during the heat of the summer.

MP ROTATOR®

Multi-stream technology

maximizes the water-efficiency

of your irrigation systems

Featuring a unique, multi-trajectory rotating stream delivery system that achieves water conserving results, the MP Rotator is a revolutionary product, unlike anything else in the field of irrigation.

A multi-stream rotor the size of a spray nozzle, the MP Rotator features only one moving part...technology that assures proven reliability. It fits any conventional spray head body or shrub adapter, transforming one into a high uniformity, low-precipitation rate sprinkler that boasts an industry first: true matched precipitation at any arc and any radius.

The MP Rotator is ideal for new systems, with ultimate design flexibility (from 4' strip to 35' radius) and better system efficiency. It's also perfect for revitalizing older systems--a retrofit can solve both low pressure and poor coverage problems. Plus, it's the solution for slopes and tight soils, as the low precipitation rate radically reduces runoff.

To save water, solve problems, and simply do a better job of irrigating, **Complete Irrigation Services, Inc.** proudly uses the MP rotator.

Revitalize Old Systems

With so many models to choose from, the MP Rotator has the perfect solution for rejuvenating an older spray system without requiring a new point of connection, new lateral lines, or new valves. Some models even make it possible to eliminate existing heads, saving additional labor and material costs. Even better, independent water audits have shown potential water savings of up to 30% when systems are retrofitted with MP Rotators.

Setting a New Standard for Water Efficiency in the Turf and Landscape Industry

The MP Rotator's multi-trajectory, revolving streams apply water much more slowly and uniformly than conventional sprays—especially after adjustment has been made to both the radius and the arc. On slopes and clay-like soils, this allows water to soak into the landscape instead of running off and being wasted. In fact, independent audits have shown that water usage can be reduced by up to nearly one-third of current levels when conventional sprays are replaced with MP Rotator sprinklers. Additional water-saving advantages include better wind-resistance, less misting, and the ability to handle reclaimed water.

Until now MP Rotator has been seen on many different spray bodies, but never has a body been created just for the MP Rotator. Introducing the MPR 40, a spray body that optimizes the performance of the MP Rotator nozzle. It provides the perfect combination of Hunter's Pro-Spray body with a specially calibrated pressure regulator. This gives the MP Rotator a consistent 40 PSI output, meaning even more accurate coverage and optimal performance.

Pressure regulated to 40 PSI for optimum efficiency with the MP Rotator.

The extra tough co-molded wiper seals prevents leaks even at higher pressures.

Two-piece ratchet design makes head adjustment quicker and more precise.

Heavy-duty body and cap construction with multi-thread buttress design withstands the harshest environments.

Features & Benefits

Superior Efficiency

Multiple rotating streams provide excellent uniformity

Matched Precipitation

Automatic matched precipitation even after arc and radius adjustment

Minimal Runoff

Low precipitation rate reduces runoff on slopes and tight soils

Rotator® Technology

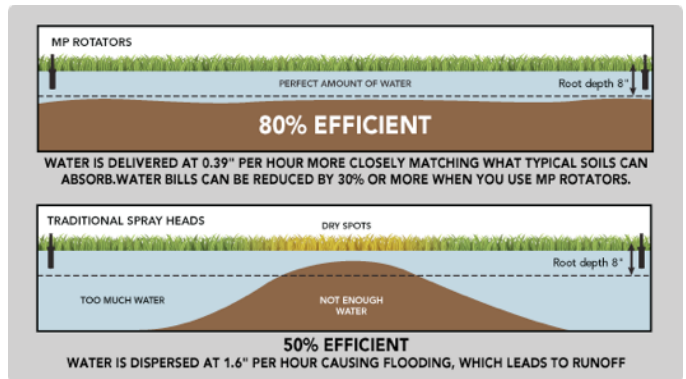

Proven in demanding agricultural conditions since 1987

Superior Dirt Tolerance

"Double-pop" flushes on start-up and shut-down

Simple and quick adjustments

Easy arc adjustment, easy radius adjustment up to 25%, no nozzle to change
